

■■ SHALX NETGUARD SOC Executive Security Report

Report ID: REP-07A0E561 | Generated: 2026-08-22 17:05:07 UTC | Classification: RESTRICTED - INTERNAL SOC ONLY

1. Executive Threat Posture Summary

During this evaluation period, the SHALX NETGUARD SOC platform analyzed real-time telemetry across **5 monitored network assets**. A total of **0 security alerts** were triaged, resulting in **0 active incident investigations**. Automated and analyst-directed responses maintained **0 active IP containment rules** on the perimeter firewall.

Metric	Value	Posture Status
Total Discovered Devices	5	NOMINAL
Total Security Alerts	0	EVALUATED
Critical / High Threats	0 Crit / 0 High	ATTENTION
Active Incidents	0	IN PROGRESS
Firewall Blocked Threat IPs	0	ACTIVE ENFORCEMENT

2. Top Priority Security Alerts

Alert ID	Severity	Category	Source IP	Destination IP	Signature / Title
None	-	-	-	-	No security alerts recorded.

3. Active Perimeter Firewall Blocked IPs

Blocked IP	Reason	Blocked By	Blocked At	Status
None	No active perimeter blocks	-	-	NOMINAL

4. Strategic Defense & Hardening Recommendations

- Verify patch levels on all Windows and Linux servers reporting out-of-spec network connection spikes.
- Maintain pfSense threat intelligence feed synchronization and inspect Suricata EVE rules weekly.
- Restrict SSH and RDP management interfaces strictly to the Security Management VLAN (192.168.30.0/24).
- Continue automated host health telemetry ingestion to catch resource exhaustion before service outage.
