

SHALX NETGUARD SOC Executive Security Report

Report ID: REP-77314350 | Period: Past 24 Hours | Generated: 2026-08-22 17:58:44 UTC | Environment: LIVE
MONITORED NETWORK

1. Executive Threat Posture Summary

During the evaluation period (**Past 24 Hours**), SHALX NETGUARD monitored real-time telemetry across **10 discovered network assets (10 active online)**. A total of **0 security alerts** were evaluated (**0 Critical, 0 High**), resulting in **0 incident investigations**. Active perimeter containment maintained **0 active IP block rules**.

Security & Network Metric	Count / Value	Operational Status
Total Discovered Devices	10 (10 Online)	NOMINAL
Total Security Alerts	0	CLEAR
Critical / High Threat Alerts	0 Crit / 0 High	CLEAR
Active Forensic Incidents	0 Active / 0 Total	NOMINAL
Active Firewall Blocked IPs	0	NOMINAL

2. Discovered Network Assets (10 Total)

Asset / Hostname	IP Address	MAC Address	Vendor / Manufacturer	Device Type	Status
V3_luvr_	169.254.4.150	E8:9C:25:1E:A8:DA	Realtek Semiconductor	SOC	ONLINE
V3_luvr_	192.168.56.1	0A:00:27:00:00:10	Mobile Device (Private	SOC	ONLINE
V3_luvr_	169.254.133.117	00:FF:4C:CA:9C:6A	Host Laptop / PC	SOC	ONLINE
V3_luvr_	169.254.27.54	FA:54:F6:41:1F:A7	Mobile Device (Private	SOC	ONLINE
V3_luvr_	169.254.196.115	FA:54:F6:41:1F:B7	Mobile Device (Private	SOC	ONLINE
V3_luvr_	172.23.230.57	F8:54:F6:41:1F:97	MediaTek Inc.	SOC	ONLINE
V3_luvr_	169.254.10.225	F8:54:F6:41:1F:96	MediaTek Inc.	SOC	ONLINE
V3_luvr_	172.30.205.46	Not available	Host Laptop / PC	SOC	ONLINE
Not available	172.23.230.19	BE:D9:B3:40:3B:0E	Mobile Device (Private	ROUTER	ONLINE
Not available	172.23.230.115	B6:52:34:D2:17:4E	Mobile Device (Private	MOBILE	ONLINE

3. Security Alerts & Triage (0 Recorded)

No security alerts were recorded during this evaluation period.

5. Active Firewall Threat Containment (0 Block Rules)

No active perimeter firewall blocks enforced at this time.

6. Contextual Defense & Hardening Recommendations

- Audit Windows endpoint security configurations and ensure critical OS patches are applied.
- Ensure Wi-Fi network encryption (WPA2/WPA3) is enforced for connected mobile and portable client devices.
- Continue automated host health telemetry ingestion across all 10 active network assets.
- No active security anomalies detected during this evaluation period. Maintain current monitoring posture.
