

SHALX NETGUARD SOC Executive Security Report

Report ID: REP-7EAE588C | Period: Past 24 Hours | Generated: 2026-08-22 17:41:48 UTC | Environment: DEVELOPMENT LAB SIMULATION

1. Executive Threat Posture Summary

During the evaluation period (**Past 24 Hours**), SHALX NETGUARD monitored real-time telemetry across **5 discovered network assets (5 active online)**. A total of **0 security alerts** were evaluated (**0 Critical, 0 High**), resulting in **0 incident investigations**. Active perimeter containment maintained **0 active IP block rules**.

Security & Network Metric	Count / Value	Operational Status
Total Discovered Devices	5 (5 Online)	NOMINAL
Total Security Alerts	0	CLEAR
Critical / High Threat Alerts	0 Crit / 0 High	CLEAR
Active Forensic Incidents	0 Active / 0 Total	NOMINAL
Active Firewall Blocked IPs	0	NOMINAL

2. Discovered Network Assets (5 Total)

Asset / Hostname	IP Address	MAC Address	Vendor / Manufacturer	Device Type	Status
pfsense-router.lab	192.168.10.1	52:54:00:12:34:01	Netgate / pfSense	FIREWALL	ONLINE
netguard-soc.lab	192.168.30.10	52:54:00:AB:CD:10	Ubuntu Enterprise	SOC	ONLINE
suricata-ids.lab	192.168.20.10	52:54:00:AA:BB:20	Ubuntu Server	SERVER	ONLINE
db-production.lab	192.168.20.50	00:50:56:11:22:33	VMware Virtual Machine	SERVER	ONLINE
win11-workstation.lab	192.168.10.105	00:15:5D:44:55:66	Microsoft Hyper-V	WORKSTATION	ONLINE

3. Security Alerts & Triage (0 Recorded)

No security alerts were recorded during this evaluation period.

5. Active Firewall Threat Containment (0 Block Rules)

No active perimeter firewall blocks enforced at this time.

6. Contextual Defense & Hardening Recommendations

- Audit Windows endpoint security configurations and ensure critical OS patches are applied.
- Verify SSH authentication hardening and inspect service daemon logs on discovered Linux servers.
- Continue automated host health telemetry ingestion across all 5 active network assets.
- No active security anomalies detected during this evaluation period. Maintain current monitoring posture.
